DETAILED ACTION

Election/Restrictions

The acknowledgement dated 12/13/04 of mistakenly indicated Applicant's election **without traverse** has been vacated.

Applicant's election **with traverse** of Claims 1-6, 32-62 drawn to Group I in the reply filed on 1/18/05 is acknowledged. The traversal is on the ground(s) that the claims do not recite distinct species and the restriction requirement is unsupported. This is not found persuasive because the non-obvious variants between each of the group present a burden in both search and examination.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **“a spectrum analyzer coupled to” as it relates to the claims 1, 32, 56** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction

Art Unit: 2817

of the following is required: the **“a spectrum analyzer” as it relates to the claims 1, 32, 56.**

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 44-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartera in view of Gunawardana et al.

As noted above, Bartera discloses an oscillator having two thermally coupled crystals as recited in the claims. However, its application, a downhole tool is not disclosed.

Gunawardana et al. shows a downhole tool a clock source. As would have been well known in the art, such a downhole tool uses a clock source for synchronization or for the processor and among other devices in the system.

Accordingly, it would have been obvious to one of ordinary skill in the art to apply this oscillator of Bartera to a downhole tool because such application would have provided the benefit of synchronization for the processor and among other devices in the system as intended.

Allowable Subject Matter

Claims 1-6, 32, 34-36, 38-42, 56-57, 59, 60, 61 are to be allowed if objections are resolved.

Response to Arguments

Regarding claims 44-49, Applicant's arguments filed 11/3/05 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, a downhole tool

shown in Gunawardana et al. as an example that oscillators are being used in the downhole tool system.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
